STADIUMS & GRANDSTANDS

Sightlines Athletic Facilities LLC offers the top-of-the-line, premium grandstands for all your facility needs. We can take your project from pre-planning and design, all the way to bidding, project management and installation. We are proud to be an exclusive representative of Outdoor Aluminum, Inc. for over 25 years.

Because our system is so flexible, your custom design options are almost limitless.

Our unique, versatile, clear-span understructure system gives you the finest, state-of-the-art, maintenance-free grandstands custom-designed and engineered to fit your existing buildings and grounds or new athletic facility developments. The clear-span design actually creates space under the grandstand... space you can use for concession stands, restrooms, storage space, locker rooms and more!

The I-Beam understructure is hot-dipped galvanized after all the cutting, punching and welding are done. That way, every inch, every joint gets maximum protection against nature's ravages.

FIT-AND-FINISH

Sightlines Athletic Facilities LLC has the best fit-and-finish in the industry. Our products and installations speak for themselves. We always encourage you to visit our past projects, walk on our decks and see it for yourself.

TREDWELD PLUS™

We are proud to carry the Tredweld Plus™ Welded Decking System – a revolutionary technology that allows us to produce components that are amazingly uniform. These decking panels are stronger, more durable and incredibly consistent throughout with virtually no noticeable deflection. The Tredweld Plus™ technology allows us to install seating and handrail components using top-side attachment methods from the entry stairs to the aisle handrails. With the Tredweld Plus™ Welded Decking System, you can have the best-built grandstand decking system in the country.

All of our bleachers and grandstands can be purchased on TIPS (The Interlocal Purchasing System) without bidding. Contact us for more details.

**ASK US ABOUT OUR ANSI HIGH TRACTION
DECKING TO INCREASE YOUR COEFFICIENT OF
FRICTION IN WET AND DRY CONDITIONS.**

NO PENETRATION OF HARDWARE

- Eliminates elongated holes from through-bolting of decking system

CONTRASTING MARKERS

- Code-compliant and safe
- No external fasteners used to attach these black anodized markers

CLOSED EGRESS STAIRS

- Cleanest and safest design in the industry
- Eliminate trash build-up
- Incorporate a 1/2" overhang

NO-GAP RISERS

- Eliminate trash build-up
- Cleanest design in the industry
- Ability to upgrade configuration
- Top-side maintenance, which eliminates the need for lifts

BEVELED THRESHOLDS

- Eliminate tripping hazards found in other splicing methods
- Clean and code-compliant

VENUE I CHAIR SEATING

- Can be added at any time without any modifications to the decking system
- No gap in the warranty. We manufacture our own chairs

**THE MOST INNOVATIVE DECKING
SYSTEM IN OVER 20 YEARS.**

PRESS BOXES

Sightlines Athletic Facilities LLC has provided highly functional press boxes for high schools and colleges all over the country. We build press boxes that can also include luxury suites, plumbing, and accommodations for special sponsors, opposing coaches and members of the working media. Whether it is one module or a grouping of modules, we can have a building in place for the start of your season.

We are the leading supplier of permanent modular press boxes. Our modular construction system allows us to provide fast prefabricated boxes without sacrificing architectural appeal. We have standard models; however, we can build custom designs, multi-story structures and steel frame or non-combustible press boxes. Materials are as varied as you wish...the floor plan starts with your idea and transferred to your vision of your facility. Let us help you with your next press box design, delivery and installation.

CUSTOM BLEACHERS

When usable space underneath the grandstand or bleacher is not an issue or consideration, our custom bleachers are the answer to your seating needs. Give us a flat and level surface, and we can build a bleacher to virtually any size and configuration you desire.

Framework of our custom bleachers is unique to the industry. You can pick from our TSA series which have vertical aluminum square tube understructures with angle horizontal members. We also offer our DLW series which are all-aluminum welded angle frame bleachers. One of our unique features of these understructures is that we weld the seams all the way around instead of our competition's preference of welding on only one side.

The design of these bleachers is limited only by your needs and the amount of area available. Press box buildings can be supported utilizing the same economical understructure as the bleacher.

Rise per row and tread depth can be in many different combinations to suit your desires and code requirements.

THE DECKING SYSTEMS FOR OUR CUSTOM BLEACHERS CAN BE AS SIMPLE AS DOUBLE FOOTBOARDS AND RISERS (SEMI-CLOSED), TO A WELDED DECKING SYSTEM, TO EVEN OUR TREDWELD PLUS™ DECKING SYSTEM. FROM THE TOP-SIDE, IT IS THE SAME DECKING SYSTEM AS OUR LARGER GRANDSTANDS GIVING YOU A GRANDSTAND FEEL ON A CUSTOM BLEACHER.

STANDARD PRODUCT

STANDARD ALUMINIUM BLEACHERS

We offer a wide range of standard all-aluminum bleachers in 3, 4, 5, 10 and 15-row systems. Most of our standard product line can be shipped to you in a few days to only a few weeks. See all our standard bleacher products and pricing on our exclusive standard product web site www.sightlinesbleachers.com
